MEMORANDUM FOR THE PRESIDENT

Your August 2 Environmental Message contained several initiatives of immediate interest to the Department of Commerce. Among other things, your implementing instructions directed the Department of Commerce:

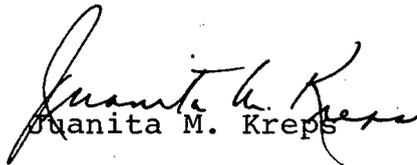

- to conduct a systematic review of Federal programs significantly affecting coastal resources to assure consistency among Federal efforts in achieving the objectives of the Coastal Zone Management Act;
- to participate fully as a member of the Acid Rain Coordination Committee in planning and managing a comprehensive acid rain assessment program; and
- to take various actions designed to strengthen enforcement of Federal wildlife laws.

I have assigned high priority to carrying out these important tasks and have given the responsibility within the Department of Commerce for doing so to Richard Frank, Administrator of the National Oceanic and Atmospheric Administration (NOAA). With respect to your coastal directive, I have directed him to execute a systematic review of Federal programs significantly affecting coastal resources. The review will encompass a wide variety of programs administered by the Department of the Interior, the Environmental Protection Agency, the Department of Energy, the Army Corps of Engineers, the Coast Guard, the Department of Housing and Urban Development, the Department of Agriculture, the Federal Emergency Management Agency, and the Department of Commerce. My hope is that through intensive consultation with these agencies, we will be able to develop proposals that will enhance the Federal Government's contribution to achievement of the national coastal policies you established in the Environmental Message.

With respect to the other elements of your Environmental Message, I have directed Administrator Frank to give higher

priority to investigating illegal trade in fish and wildlife, and to participate actively on the interagency wildlife committees established at your direction. In addition, I have asked that NOAA provide its full support to the work of the Acid Rain Coordination Committee.

I understand that NOAA officials have met already with your Council on Environmental Quality to discuss our plans for carrying out your instructions. We will continue to work closely with CEQ and the other Federal agencies to ensure effective implementation of your Environmental Message.

Juanita M. Kreps
