To See Complete Finding Aid:
http://www.jimmycarterlibrary.gov/library/findingaids/Staff_Secretary.pdf
It's no easy thing to come into Charleston, West Virginia and appear at the same civic center the day after Willie Nelson was here. The worst thing about it, of course, is that I missed the concert.

What gives me the courage to try to follow Willie Nelson's act is the knowledge that I'm coming here to talk to you about a man who, in a very different way, has done so much to give pleasure and hope to West Virginians. Jennings Randolph has stood for years in the forefront of major programs to meet human needs and promote economic development, not only here in the Appalachian area, but in the whole nation.

A little over a year ago I proposed a comprehensive energy plan, one which the Congress has not been unduly hasty in approving. Senator Randolph, I'm sure, understands
what it is to wait for the Congress to act on matters of energy.

I've often said that if we had begun efforts to use energy efficiently and develop alternative sources back in the 1950s we would not have the problems we have today. But Senator Jennings Randolph began warning the nation way back then -- a lonely voice -- of the dangers of depleting domestic energy resources and becoming dependent on foreign supplies.

In 1971, two years before the oil embargo shocked most of the nation into realizing he had been right all along, he sponsored legislation establishing the National Fuel and Energy Policy Study.

That wasn't the first time he was ahead of the nation and had to wait for the rest of us to catch up. He first introduced a Constitutional Amendment to lower
the voting age to 18 when he was in the House in 1942.

He was an early advocate of an interstate highway system, and has been the author of just about every major highway bill in recent years. He has fought to bring opportunity to isolated people, in both rural and urban areas, by giving them the highways and public transportation. He was the father of the Appalachian Regional Development Act of 1965, sponsored important anti-pollution and recycling legislation. He has long been an active spokesman for the disabled and handicapped, especially victims of black lung disease.

I could go on and on, but you know his past service to the Appalachian area even better than I do. You probably drove in here on roads that wouldn't be here if Jennings Randolph hadn't been in the Senate.

But I learned early in politics that it's not what you did for people last year, or even last month,
that counts, it's what you've done for them lately. What has Jennings Randolph done for you lately?

For one thing, he is currently sponsoring legislation, along with Senator Gary Hart, to provide impact assistance for states and communities affected by rapid energy development.

An even more important question is "What will he do for us in the future? What's ahead in the next six years if we send this man back to Washington?"

And there again, I think you may know even better than I do what's ahead. This nation has to work out a long-term energy policy that will meet our needs for the rest of this century -- and for the next century. Those little children going home in those big yellow school buses in a few minutes will just be approaching their 30s when the next century begins. They will have a
long time to live with the solutions we hammer out in the next few years. They'll have a long time to regret the solutions we fail to work out.

These next years will be crucial in deciding what directions our energy policy will take, and how fast we will go. West Virginia has a special stake in those decisions. This country needs to have a man with Jennings Randolph's wide experience in energy problems. We need Jennings Randolph's grasp of all aspects of the coal industry and his knowledge of coal's potential.

In the years to come we will need Senators who understand the needs of rural as well as urban areas, who can foresee the opportunities that access can bring. We'll need Senators who know what a good road can mean to a child trying to get to school, to a mother trying to supplement her family's income, to a young man seeking
his first job, who understands how much of what we produce must move on wheels if it is ever to be used.

Since I came to Washington, Jennings Randolph has been a great help to me, as counsellor, conciliator and strong advocate when I needed him.

I'm sure you all know the importance of having Jennings Randolph in Washington to look after West Virginia's interests -- and the interests of the whole nation. If you didn't, you wouldn't have returned him so many times. I'm sure you realize what a great team Jennings Randolph and Majority leader Robert Byrd make. West Virginia has been fortunate to have two such distinguished Senators to serve you at the same time.

But I hope you won't decide that because everybody knows he has helped you all for so long, he won't need your help this time. I hope you won't assume that because the voters have always responded before, they will respond
this time without any reminders.

Just because he has always been there when we needed him, doesn't mean you can take his services for granted. He needs your active support all the way in this campaign. I need his help in Washington, and he needs your help here. I hope you'll give it to him today, and every day, until the votes are counted. His experience, and his voice of moderation, are too valuable to risk losing.

I mentioned Willie Nelson earlier. Right now he sings a lot about my home state, Georgia. One of the things country music has always done is express the homesickness of people who have been forced to leave their rural homes and seek opportunity far from those they love and the places that they grew up in.

For too long, too many of West Virginia's young people had to leave home to make a decent living, just
as too many of the young people where I grew up had to leave to find opportunity. Jennings Randolph has spent his life trying to make West Virginia a land of opportunity again. With his help, it's come a long way. These next few years could mean that more and more of your bright ambitious young people will be able to stay here. They could mean that more and more will be able to come back instead of just sing lonely songs about home. When they come, they'll come back over bridges Jennings Randolph helped to build.

Jennings Randolph has always built bridges for people. I'm not just talking about concrete and steel bridges here in West Virginia. I'm also taking about the bridges of understanding he built between his colleagues. A man from the hill country, where people identify themselves by what creek they grew up on, understands the importance of good bridges. Jennings Randolph knows how to build them.
Thank you for the kind invitation, Alex, and the invitation to come here today.

Miss Lillian sends her best wishes -- and told me that her offer to campaign door-to-door with you still stands.

Those of you here have already shown your commitment to Alex by your presence, so I won't take up your time by preaching to the saved.

Let me just say that Alex Seith has been a valuable friend to me in Illinois. He has been working for the interests of Illinois for years already. And if you will send him to Washington he can continue to work for your interests.
When I started from scratch in 1974 and 1975, 
Alex was here to help with my Presidential campaign. 
He stuck with me all through those long, lonely months, 
and since the election has been a valued advisor.

Now he's working on another underdog campaign -- 
his own -- and I want to thank you personally for 
helping him.

We've got our work cut out in Washington, so 
I've already got some projects for him after he gets 
elected in November.

I need help to continue the progress we've made 
in reducing unemployment.

Last year, we added over four million new jobs 
to the economy -- the largest one-year increase in our 
history. We added more than a million so far this 
year -- a half-million jobs just last month.
We're determined to sustain that progress, as well. The tax bill we are shaping with Congress can help sustain that growth through late 1979. And we're working hard to encourage capital formation and job-creating investments for our long-term future.

Moreover, we have tackled the tough problem of government efficiency. Just about anyone who does business in this country knows first-hand the problem of government red tape. I know that I did as a businessman in Georgia.

That's why this problem became a centerpiece in my Presidential campaign -- and a centerpiece of my Administration.

We've already put in place zero-based budgeting. We've proposed civil service reforms to make the system more flexible. We're expanding competition in regulated
industries like the airlines. We're taking a hard look at unnecessary regulations that raise business costs. And we're developing the most comprehensive government reorganization ever proposed.

Finally, we've adopted the fight against inflation as our number-one job. We're using every means at our disposal.

We held down Federal spending to the smallest real increase in 5 years. We scaled down our tax cut proposal to keep down the deficit. We're holding down Federal pay increases. We pledged to eliminate wasteful regulations. I ordered Federal agencies to stop buying goods priced too high by inflation.

The real action, however, must come from business executives like you, and from labor. That's why we have emphasized a program of voluntary wage and price restraint -- to pull down inflation one notch.
at a time.

I know that's ambitious. But it's our only alternative. We know already that mandatory controls don't work. We know already that throwing people out of work doesn't cure inflation.

So we've all got to work together -- to share the necessary sacrifices and use our good sense -- to pull ourselves out of this inflationary spiral.

Well, as you know, none of these problems is simple.

That's why I need plenty of help in Washington. I need good, hard-working, smart, dedicated men and women in Congress to help us.

I need Alex Seith in the Senate. Illinois needs Alex Seith.

Again, thank you for helping Alex so generously.

And thanks for your attention.

#  #  #
BAKALIS FUNDRAISER, SPRINGFIELD, ILL., May 26, 1978

It's great to be down here with Mike Bakalis.

Mike is the kind of Democratic candidate we need -- honest, energetic, in touch with what the people need -- and not afraid to take on anybody who stands in the way of getting it for them.

I ran for President because there were certain problems in our country I wanted to see solved. But most Federal programs are actually run by state and local governments -- and their success or failure is determined not by our intentions in Washington, but by the determination and efficiency of the people you elect to state and local office.
Sangamon County, for instance, got a total of $661 million in Federal funds last year, more than two-thirds of that in grants of various kinds. How well all this money meets the need it was appropriated for depends on how programs are administered at the state level.

Whether the increases we've recommended in basic education funds ultimately mean your children master basic skills in Springfield or Cairo or Carbondale, will depend on how well your state and local governments use that help. Whether your car is battered to pieces by rough roads or falls into a pothole and is never seen again does not just reflect how much Federal road money you get. It depends on how your state government makes use of all road money at its disposal.

Too often in the past, when our people have become concerned about a problem, we have set up a
Federal bureaucracy to be in charge of it. What we need is not bureaucracies in charge of problems, but solutions to those problems.

We want roads people can drive on, human service programs that work, Medicaid that gets health care to people who need it instead of just filling the coffers of Medicaid mills.

We don't want a hundred good reasons why our schools can't educate our children. We want people who understand the problems and can see their way to some solutions.

We need people who have experience in education at all levels, who've worked with state budgets on a daily basis. We need people who can put together programs that will teach our children the skills they need without pushing up property taxes to levels that no one can afford.
In short, we need someone like Mike Bakalis. Mike has taught at the elementary, secondary and college levels. As comptroller he gained broad experience in the whole range of state needs. Mike knows what you need and what it costs. He even knows where some of the fat can come out to make it possible to do what you really want done.

Sometimes we look at Federal dollars as something like manna from heaven -- unexpected bounty we have no control over, and which might disappear the next morning if we don't use it up today. Sometimes we forget that the Federal dollars which come back to our towns and states are the same hard-earned dollars we sent to the Internal Revenue Service ourselves.

We get in the habit of thinking of government, especially the Federal government, as something separate from us.
Government in a democracy can no more be separate from the people than the ocean can be separate from the drops of water that make it up. If our government fails, it fails all of us. If it succeeds, it succeeds because we make it succeed.

Mike Bakalis understands what it costs to pay for a decent place to live -- for an education -- to feed and clothe growing children. His parents came here from Greece with nothing but the will to work and the dream of a better life for their children. His father drove a truck, delivering pies until he could save up enough to get his own little short-order restaurant. His mother was a seamstress. Their sons had to work to help pay their way through college. George went on to law school, Mike got his doctorate. They are proof that the American dream still comes true, that what really counts is still what's inside the individual and whether he or she cares enough to
make the dream come true.

One of the things Mike learned from his parents is where money comes from -- and he remembers that when he's dealing with your money. He knows what inflation can do to dreams that people work and save for. He knows how it eats up the hard-earned dollars you manage to put aside for a home, for education and for your children, for a business of your own, or for security for your old age. And he cares about what government does with those dollars you worked so hard to earn. He doesn't want them wasted.

Today it sometimes seems that everyone asks first what government can do for them, and then why wasn't it done sooner.

This has been described as the "me first" era.

When it comes to cutting down on energy consumption and inflation, there's a tendency to say "me last,
Some of our leaders -- in politics, in the media, in business and labor -- insist that people won't do what has to be done voluntarily to conserve energy or to slow inflation, that only forcing them will work. That's not the American way. It never has been. I think the people are still willing to sacrifice for what they believe in, and for the good of the country as a whole today, as they have always been. I think President Truman was right when he said that if the American people understand the problem and what has to be done, they'll come through every time.
Ideally everybody would just pitch in together, but it doesn't usually work that way. Somebody has to go first. Usually the other fellow won't, so you just have to start yourself. When he sees he won't be alone, he'll come along, too.

The same thing is true of political campaigns. You can't wait until that nice guy you'd like to see get somewhere is a shoo-in. You have to make it possible. You have to get out there first and get it started and then others will follow.

Some people urged Mike Bakalis not to get in this race this year. They reasoned he would have faced little serious opposition running for comptroller again. Some even said this was not a Democratic year in Illinois.

There were people in 1948 who said the same sort of things -- 1948 wasn't supposed to be a Democratic
year in Illinois. Thomas E. Dewey was going to beat
Harry Truman and Adlai Stevenson and Paul Douglas
couldn't possibly win.

But 1948 proved that any year is a Democratic
year in Illinois if the Democrats of Illinois want it
to be. The Democratic Party in Illinois has been
divided, just as our nation was divided. But you've
healed those wounds, just as our nation has healed its
wounds. We've come back together stronger and more
realistic and surer of our goals.

Mike Bakalis ran for superintendent of schools
in 1970, against an incumbent whom some people said
couldn't be beaten -- and Mike won. Then he ran for
comptroller in 1976 against an experienced politician
some people said was unbeatable -- and Mike won. Now
he's running for governor against a Republican incumbent
and it's an uphill race. But Mike Bakalis is used to
running uphill. He wouldn't know how to run any other way. And Mike can win again.

I know what it is to come from behind. When I first told my mother I was going to run for President she asked, "President of what?"

You don't have to start ahead -- just so you get there in the end. Mike Bakalis can get there. It won't be easy, but nothing worthwhile ever is. He can make it if you care enough and work hard enough. But he has to have your help all the way.

#  #  #
I came here today intending to give a speech about a subject that has concerned me in all the time I've held public office.

It's a problem that I know concerns you too—the challenge of answering our people's dissatisfaction with their government.

When I was a businessman in Georgia, I knew how frustrating it was to deal with government. I came to Atlanta and I understood why.

I spent two years travelling from state to state throughout this country, and I found that people everywhere felt the same weariness with a government that took so much of their money, and interfered so much in their lives, but had so much trouble delivering its services and met so few of their needs.
Part of the reason every one of us was elected
was to do something about that problem.

That is the battle I've been fighting hardest
since I came to Washington. I've tried it with 20
reorganization projects, through zero-based budgeting,
by overhauling the way we write regulations. And
I've been working for the single most important step
toward a more efficient government -- civil service
reform, which is my highest reform priority for this
year.

It's been harder than I thought.

But I'm not going to give you a speech about these
problems. You probably know them better than I do.
You see them every day. You hear about them from the
people you represent.
What I do want to tell you is how much we need each other's help. None of our efforts to reform the federal government will really make a difference unless they're matched here in Springfield, and in each of the 49 other state capitals.

But until we reform the Federal government, states and cities will continue to be prisoners of its inefficiency, its duplication, and its waste. We'll never get our government under control or win the fight against inflation unless we make the fight together.

I promise you my best efforts -- to put the federal government's own house in order, so we don't make life more difficult for you in Springfield, and in every county and city of your state.
But I need your help too. You are helping now by making your state government more efficient, but the most important help of all is building support for reform.

Sometimes it's discouraging that, even when most of our people want reform, even when the great majority would benefit from change, it sometimes seems impossible to make any change at all. Special interests are well organized to protect their captive agencies. A powerful alliance of entrenched bureaucracies and well-focused interest groups can bottle up reform proposals in committee, or emasculate them before the taxpayers know what's happened. The only thing that can beat them is the voice of the public interest, of the common good -- when that voice is loud and clear and... I've
come to ask for your help in raising that voice.

Now I've said enough. It's time for me to stop. Instead of coming to give a speech, I've come here to listen -- to hear your concerns, and to answer your questions. I'd like to know what's on your minds, and on the minds of your constituents -- who, I'm proud to say, are my constituents also.

[Ask for questions]
Speech to Illinois Legislature - 5/26/78

Governor Thompson, etc. salutations . . .

I am honored to stand today before the same assembly in which Abraham Lincoln once served, and which Adlai Stevenson so often addressed.

No state has exceeded Illinois in the gifts of political courage and leadership it has made to our nation. The men and women of your state have set a standard for all of us who have followed them in public service.

Throughout our history, this state -- and this city -- have been the testing grounds for great issues in our national life. More than one hundred years ago, Lincoln and Douglas met here to debate the future of the Union. Today you play a part in one of the great
debates of our day. Your own state constitution is one of the few in the nation which includes a provision guaranteeing equal rights to all citizens, men and women alike. I hope that you will carry out your historic responsibility by voting to add an Equal Rights Amendment to the Federal constitution as well.

I come here today as one of your colleagues, as one whose own public career began in a state legislature. I respect the difficult work you do each day as you balance interests and responsibilities, and I share many of the same experiences and outlooks with you.

From that common background, I would like to talk about one of our greatest common burdens -- that of ensuring that government at all levels, federal, state, and local, more efficiently meets the needs
of the people it was created to serve.

You know as well as I do that we've got a long way to go.

Government reform was a basic theme of my campaign. It has been a basic task of my year-and-a-half in office. And I pledge today that it will continue to be a basic priority throughout the rest of my term.

For it is still an urgent requirement. From one end of the country to the other, our people are tired -- tired of the waste, inefficiency, complexity, and secrecy of the government.

They're mad. And they're looking to us to do something about it.

I need your help, and you need mine -- and we both need the Congress -- to give the American people the
kind of government they need, and deserve, and want.

I am here today to ask for your help -- and to emphasize how closely our efforts to reform the federal government are connected with your efforts in the states. I know, from my experiences as a legislator and governor, that until the federal government gets its own house in order, states will be the victims of its senseless over-regulation and needless delay.

But I also know that reform will only realize its true effect when the efforts made in Washington are matched in Springfield and in 49 other capitals -- when all of us cooperate to change the way we do the public's business. I need your ideas about making this change; I ask your help in maintaining the momentum for reform; I intend to involve you at every step of the way.
In the last sixteen months, my Administration has taken some steps toward a more open, honest, and efficient form of government.

First, we have set a high standard of conduct for this and succeeding Administrations. I required financial disclosure by all senior officials, tightened conflict-of-interest regulations, and sent to Congress legislation that would give these regulations the force of statute. We are working for passage of a bill to register and disclose the activities of lobbyists before the government.

Second, we have made the Federal government and its officials more open and accessible to all citizens. And I have begun a thorough review of our system of security classification of government information to eliminate unneeded secrecy.
Third, I have used administrative means at my disposal to reduce the burden of unnecessary regulation on business, on other levels of government, and on ordinary citizens. We have ended the worst nit-picking at the Occupational Health and Safety Administration, for example -- opened up the airline industry to more competition -- and are considering the costs, as well as the benefits, of new regulations.

To aid cities and states, I have ordered that all reporting requirements for grant-in-aid programs be eliminated, if found unnecessary. And as part of my efforts to put the partnership between federal government and the states on a more sound, predictable footing, upon taking office I instructed Secretary Califano to negotiate with the states for resolution of $2.6 billion
in pre-Title XX social service claims. This had been a matter of contention and uncertainty for years. We reached agreement on a $543 million settlement which I included in my budget for FY 1979. This week the House passed the necessary legislation and it is moving through the Senate. On the basis of this initiative Illinois can expect to receive in FY 1979 $32 million as its part of this settlement.

Finally, I have obtained from Congress the authority to reorganize the structure and management of executive departments, subject to Congressional veto. We have already centralized energy policy into a new Cabinet department, consolidated job discrimination agencies, and proposed a Department of Education to streamline educational programs.
We have made a good start -- often by drawing on ideas that had first been proposed by the states. But that is not enough. You know first-hand one of the most urgent reasons why we must do more -- because Federal inefficiency makes prisoners of the states.

This is something that has troubled me from the very beginning of my career in public office. And I hear enough from you and other officials to know that, from the state and local perspective, the situation is grim.

In my experience in Georgia state government there were few things more frustrating than dealing with the Federal bureaucracy.

When my State or a locality in Georgia sought aid or cooperation from Federal officials, it seemed
inevitable that the paperwork, the complexity, the nit-picking, and the frequent ineptitude made the effort more trouble than it was worth.

Frequently, we could not fill our needs with the specific programs offered, even though there were hundreds to choose from.

If we found the right program, we often had to accept a Faustian bargain. In return for other delayed and uncertain aid, we had to accept arbitrary changes of policy or frequent arrogance, assume burdens we did not want, follow rules that bore little relation to our own situation, while the real needs of our citizens went unmet.

In other words, instead of equal partners, State and local governments are often the reluctant clients of
the Federal government. That's not how the system is supposed to work.

After a year-and-a-half, I am still frustrated by the Federal bureaucracy. There are few levers a President can pull that get immediate action. There are too many agencies, doing too many overlapping things, wasting too much money, doing more than they should, and neglecting our real problems.

We soon will have a half-trillion-dollar Federal budget. But even the most fundamental government tasks are carried out with excruciating ambiguity and duplication.

There are, for example, at least 75 agencies and 164,000 Federal employees in police or investigative
work. Many of them duplicate or overlap State and
local policy unnecessarily. Something as specific as

guarding our borders takes four agencies -- the
Coast Guard, Customs Service, Drug Enforcement Adminis-
tration, and Immigration and Naturalization Service.

When private citizens seek the simplest form of
help from their government, too often they get only
long waits, unanswered letters, complicated forms,
referrals to other agencies, and plain inaction.

For example, a welfare mother with two children
may have to deal with 11 different Federal agencies for
services. If there is an old or disabled person in the
family, there are even more agencies to see. All told,
there are more than 100 Federal human services programs,
administered by 10 different departments and agencies.
If State or local governments seek help, they may not fare much better.

While many of our cities and towns are in deep economic trouble, the Federal effort to aid them is shackled by this bureaucratic burden. To aid community economic development, for example, there are:

-- over 11 different business-assistance programs in more than 10 agencies;

-- 46 sewage-related programs in five departments, two independent agencies, and eight regional commissions;

-- at least 77 different housing programs in 15 different agencies;

-- 60 transportation grant programs in the Department of Transportation and 25 other agencies;
and 24 programs administered by 10 agencies for employment and training.

To keep up with this maze, 24 states and 44 cities now have their own offices in Washington. And I know that every well-read state or local official has a copy of the ___-page Catalog of Federal Assistance.

Certainly, these programs have contributed greatly to a better life for people in need. I have no quarrel with that, or the fact that we must serve many of their needs.

But I do not doubt that we could do much better with the resources we have. And I deeply resent the obstacle that this widespread inefficiency has become to serving human and community needs more effectively.
It is a sad irony: We are a people of the 20th
Century, working with a government structure that
comes from the 18th and 19th Centuries, trying to pre-
pare for the challenges of the 21st Century.

That's why I will not rest until we have made
permanent, important reforms in the way our govern-
ment operates.

Cash management

We have already begun to use zero-base budgeting
in all executive agencies -- to identify and eliminate
low-priority or useless spending.

We are undertaking "sunset" review of programs and
legislation, to make sure that Federal agencies do
not outlive their usefulness.

On Tuesday, I sent to Congress a landmark Civil
Service reform bill, which would bring to our system such elementary devices as rewards for success and hard work, flexible assignments, protection from political abuses, and accountability for poor performance.

We are attempting to overhaul the way government regulations are set, to make sure that they accomplish their objectives in the least burdensome way. Regulation has too often been fragmented, short-sighted, and dominated by special interest. We have to be sure it serves the common good for a change.

And we have underway about 20 studies in the most thorough effort ever launched to reorganize the Federal government.
But even this beginning will fail if I do not enlist your help, and the help of your citizens.

For there is powerful resistance to any change in the status quo.

There is in Washington the iron triangle of bureaucrats, Congressional patrons, and special interests who can mobilize strong opposition to the reforms we need. When the great majority of our people would benefit from change -- such as Civil Service reform -- and only a small minority is opposed, it is often only the minority which makes its voice heard. State governments -- either elected or agency officials -- often join in this opposition.

From my own experience, I know that we may have resented the Federal agencies that provided aid --
they may have been inefficient agencies -- but they
were our agencies, and we fought to protect them.

It was the expedient thing to do.

If any of us expects to do better in the future, we cannot do it separately -- by pursuing our narrow interest, by expediency, by ignoring innovation, or by resisting consolidation.

It could mean hard questions for Federal programs that you depend on. But it could also mean cutting back unproductive, overlapping, deadwood programs that every year drain billions of dollars from people in your city or state who need help.

All of us need to explore the present. John Kennedy said it well not long ago:
"As every generation has had to disenthrall itself from an inheritance of truisms and stereotypes, so in our time we must move . . . to a new, difficult but essential confrontation with reality . . . We cannot understand and attack our contemporary problems . . . if we are bound by traditional labels and worn-out slogans."

I believe strongly in our ability to solve problems together -- the Federal government working with state and local governments and the private sector to make a better life for all Americans.

I only ask that you help me develop the kind of Federal government capable of fulfilling its responsibilities -- so that we can win back the confidence of Americans -- and give new hope to us all.

# # #
Statement on Inflation for May 25 Press Conference

I continue to be very concerned with the problem of inflation. It is the most serious economic problem we face, and we must deal with it forcefully and effectively if we are going to maintain a strong economy.

In the first three months of this year, consumer prices rose at an annual rate of more than 9 percent. Much of that rise was due to the effects of cold weather on supplies of meat and vegetables -- and there is very little we can do about that. But we can reduce the danger that higher inflation will spread to other sectors.

Two weeks ago, my Administration worked with the Congress to reduce the size of next year's Federal deficit by trimming the tax reduction and putting it off for three months. That was an important step in our battle against inflation. But its benefits could be lost unless Federal spending is kept under very tight control.
That goal is threatened by proposals now under consideration in the Congress -- proposals for increases in highway programs, in defense spending, in public works, in veterans programs, and in SBA loans. These could add (more) $6 billion or more to the budget I submitted to the Congress in January. We simply cannot afford to let these increases occur.

There are other legislative actions being discussed by the Congress that would damage our ability to reduce the rate of inflation. For example, one Senate Bill would increase sugar and other sweetener prices and would add three quarters of a billion dollars to consumers' food budgets in the first year and even more in subsequent years. I recognize that producers in the sugar industry need assistance. But the Administration has sent to the Congress a bill that would do that without adding to consumer prices.
I am also concerned about the large number of bills introduced in the Congress to restrict meat imports. Passage of such legislation would be irresponsible -- and it is hard to understand why the Congress is considering such action at a time when meat price increases are contributing greatly to inflation.

I strongly oppose these inflationary measures to raise the price of sugar and meat. And I stand prepared to use the full powers of my office, including the veto if necessary, to prevent the enactment of spending measures that, in my judgment, threaten the integrity of the budget and the health of our economy.

I have already begun work on my next budget, and I intend to apply even more stringent standards to hold down the deficit in Fiscal 1980.

There is one other piece of legislation before the Congress that I believe is crucial to our efforts to
reduce inflation. That is my proposal to contain hospital cost increases. For several years, medical costs have been rising much faster than just about anything else. It will be very difficult to bring down the overall rate of inflation if hospital costs continue to run out of control. The program I have proposed would begin to bring those increases back into line.

We need this kind of legislation and we need it soon. I call on Congress to pass effective cost containment legislation as soon as possible.

# # #
Thank you for the introduction.

There's nothing like a quiet evening in Chicago with a few friends -- Democratic friends, especially.

As I went from room to room here tonight -- as I look across this crowd of Democrats, united behind your candidates, I'm sure that we really have been brought together.

And just as 1976 was a Democratic year, 1978 will be a Democratic year too.

I know that God must love Cook County Democrats, or he wouldn't have made so many of you.
I've learned from experience that Cook County Democrats are the hardest-working, most loyal Democrats in this country.

You must be following the advice that Adlai Stevenson gave us over two decades ago, when he said, "If you want to live like a Republican, you have to vote like a Democrat."

I only wish tonight Dick Daley could be with us -- the man who made Chicago synonymous with effective, workable government -- the man who was so helpful to our effort in winning back the White House -- a man whom all of us remember with respect and deep affection.

I didn't grow up knowing and respecting Dick Daley as many of you here did. But there's no one who taught me more about the Democratic tradition
than he did. Dick Daley was always very good to me --
and he was good to the people of the city he loved.

As a candidate in 1976, I drew strength from
the support you gave me here. And I know that the
candidates you've supported and sent to Springfield and
Washington cannot be equalled anywhere in America.

It was Jack Arvey and the Cook County Democrats
who put together the great ticket of Paul Douglas and
Adlai Stevenson in 1948. It was Dick Daley and the
Cook County Democrats who helped send another Adlai
Stevenson to Washington in 1970.

And this year, it will be George Dunne, Mike
Bilandic, Danny Rostenkowski and the rest of the Cook
County Democrats who'll send Alex Seith to Washington
and Mike Bakalis to the Governor's Mansion.
You've done it before. I know you can do it again.

I know that the Republicans can outspend us. They just about always have more money to spend than we do.

But they can't outwork us Democrats. They can't outwork us in the South Side, in Bridgeport, Evanston, Cicero, Oak Park, or any of the other towns and neighborhoods of Cook County.

And they haven't earned the deep loyalties of the people of this country.

The men and women who remember the great Democratic Presidents of this century -- Woodrow Wilson, Franklin Roosevelt, Harry Truman, John Kennedy, Lyndon Johnson -- they remember the promises our Party made, and the promises we've kept.
Men and women in this tradition have gone to
the polls again and again to send Democratic candidates

Because of Cook County Democrats and Democrats
The United States everywhere, we have been the majority party of this
nation for nearly five decades. 50 years.

We've set the political agenda for this nation,
for nearly five decades.

We've provided the leadership -- the reforms --
the great social and economic advances. We've
brought prosperity and jobs. We've provided the
new ideas, the new faces, the progressive changes.

Now we're leading the way on the new challenge
of our era -- making our government lean and efficient
enough to do the job the people want it to do.
We brought into our political system young people, immigrants, minorities -- and we provided dignity and hope for them all.

Franklin Roosevelt said it so well in 1932:

"These unhappy times call for the building of plans . . . that build from the bottom up and not from the top down, that put their faith once more in the forgotten man at the bottom of the economic pyramid."

Compare that to the Republican Party. Its answer to just about every serious question and problem in this century has been one word -- no.

Before I got elected with your help, they sat in the White House and said no to putting people
back to work.

but we Democrats have said if
They said no to aid in education -- yes to
decent health care -- no to any real effort to stop
inflation -- no to adequate housing -- no to tax reduction and
reform -- yes to solving our energy crisis -- yes to
reorganization and efficiency in government -- and
yes to human rights in other countries.

The nation said no to the Republicans

Well, in 1976, we said no to them. And we'll
tell them the same thing again in November in Cook
County, and in every other county in this nation.

With the help of Adlai Stevenson, Danny
Rostenkowski, and the rest of the Illinois Democratic
delegation, we've already begun to tackle our most
serious problems.
-- We added four million new jobs to our economy since January 1 last year -- a record never before equaled last year -- more than in any other single year in our nation's history.

We're still expanding jobs for Americans. Last month alone, we created more than a half-million more. And we'll make sure that Cook County gets its fair share of those jobs.

-- We're facing up to inflation -- not by keeping people out of work or by mandatory controls -- but by pulling down the wage-price spiral voluntarily.

We've frozen salaries for Federal executives to make sure that the government sets an example of restraint.

-- We're bringing the huge Federal bureaucracy under control -- reorganizing it, cutting red tape, eliminating useless regulations. We've begun to write necessary regulations in plain language and we're asking the authors to sign them!
We're close to a national energy plan -- a goal Adlai Stevenson has worked so hard for -- to cutting down our dependence on foreign oil.

We've begun a national urban policy to put new life into our great cities.

We've revived housing programs, job training, public transportation, environmental protection, civil rights enforcement, the Peace Corps.

We ended the cutbacks in aid to education.

We increased that aid -- and put the emphasis back on efficient use of funds for basic learning skills.

We've kept a strong defense force, and breathing new life into our vital military alliances like NATO.

We've gone for the past year and a half without having one American soldier shed blood in any foreign war.

We are working to stop nuclear proliferation and to remove the threat of destruction from atomic weapons.

And I'm proud to say we've put our national prestige on the line for human rights in every corner of the world.
Whether a country is behind the Iron Curtain or not, we will no longer be silent about oppression and injustice. We're saying, give your people freedom to worship, to express themselves, to shape their own future, to vote, to live in peace -- to live in freedom.

We've done all this in just a year and a half.

It's just the beginning, too.

-- We're going to reform our health care system -- to guarantee decent health care for every citizen.

-- We're going to reform our welfare system -- to cut waste and to help break the tragic cycle of poverty once and for all.

-- We're going to reform our tax system -- to make it simpler and fair for every working family.

-- We're going to make sure that every tax dollar is spent wisely -- to wring out the waste from
our system. We've already frozen salaries for federal
executives, and we're going to take a close, hard look
at every program that spends the taxpayers' dollars.

In short, we're going to put aside the neglect
of eight long years and get back to work. We're going
to start again on the unfinished agenda that we set
for ourselves nearly five decades ago, during The
Hoover depression.

That means hard work ahead -- electing Democratic
Senators and Congressmen and Governors and State Legis-
lators and Mayors and county executives and aldermen who
care about people, who come from the deep traditions
of this Party.

We're the oldest political party in the free-
world today -- 186 years old, led in the early years
by Thomas Jefferson and other great Americans.

But we didn't come this far by letting the system
work by itself. It takes people of all colors, back-
grounds and ages, from all walks of life -- to keep
a Party like the Democratic Party fresh and active --
to work not just at election time, but every day.

That's why we have been so successful -- and will
be again this year in Cook County, and in Illinois.

So I call on you tonight to keep working for this
great nation & this
great Party of ours. Give it your support generously.

Keep it alive and vital. Keep it open and responsive
and caring.

Above all, keep it serving the people, the way
it always has in our long history.

#  #  #
PRESIDENT JIMMY CARTER
COAL STATEMENT
CHARLESTON, WEST VIRGINIA
MAY 26 1978

SENIOR RANDOLPH, GOVERNOR AND MRS. ROCKEFELLER,
CONGRESSMAN SLACK, MAYOR AND MRS. HUTCHINSON, ED WILES/
PRESIDENT OF WEST VIRGINIA COAL/, GOVERNOR SCOTT/FORMER
GOVERNOR; CHAIRMAN OF APPALACHIAN REGIONAL COMMISSION/,

IT'S GREAT TO BE HERE AND SEE JUST WHERE
"SUPERBLOCK" IS GOING TO BE.

I'LL GLAD THAT THE ECONOMIC DEVELOPMENT
ADMINISTRATION WAS ABLE TO ANNOUNCE A $5 MILLION
GRANT THIS WEEK FOR THE CONVENTION CENTER COMPLEX,

(--- NEXT PAGE ---) WHICH I UNDERSTAND
Which I understand will include a 12,500 seat multi-purpose arena parking area, and new lobby connecting to this building.

Superblock is a fine example of what a partnership of federal, state, local and private action can do to help revitalize our cities.

In addition to the EDA grant, I'm told you will be using about $2.8 million in community development block grant funds, a hotel-motel tax and general obligation bonds to raise an additional $11 million, . . . and a hotel and commercial area are planned by private developers next to the Center.

Senator Jennings Randolph . . .
SENATOR JENNINGS RANDOLPH AND CONGRESSMAN JOHN SLACK HAVE WORKED HARD TO MAKE THIS JOINT DEVELOPMENT POSSIBLE, AND PROVIDE STIMULUS FOR CHARLESTON'S ECONOMY.

WHEN I SPOKE TO THE NATION A YEAR AND ONE MONTH AGO, I CALLED ENERGY THE MOST SERIOUS CONTINUING CHALLENGE THAT WILL FACE OUR NATION IN OUR LIFETIMES.

I REMAIN CONVINCED OF THE TRUTH OF THAT ASSESSMENT.

ENERGY IS INEXORABLY LINKED TO OUR PROSPERITY AT HOME AND OUR SECURITY IN THE WORLD -- BOTH OF WHICH ARE IMPERILED BY OUR GREAT AND GROWING THIRST FOR FOREIGN OIL.

( -- NEXT PAGE --) LAST APRIL, TO ...
LAST APRIL, TO DRAMATIZE THE SERIOUSNESS
OF THE CHALLENGE, I COMPARED IT TO WAR.
AND IN THIS WAR, THE MOST FORMIDABLE WEAPON
IN OUR ARSENAL IS COAL.

WEST VIRGINIA ALONE COULD SUPPLY ALL OUR ENERGY
NEEDS FOR MORE THAN A GENERATION.

APPALACHIAN COAL FIRED THE FURNACES THAT MADE
THIS NATION A GREAT INDUSTRIAL POWER. IT FUELED
THE ENGINES THAT FIRST CONNECTED OUR LAND FROM
SEA TO SEA.

IT STILL PROVIDES MUCH OF OUR INDUSTRIAL AND
ELECTRICAL POWER.

ULTIMATELY, WE WILL LEARN TO CAPTURE THE
ENERGY OF THE SUN AND OCEANS TO MEET OUR NEEDS.

BUT FOR NOW . . .
BUT FOR NOW WE HAVE NO CHOICE BUT TO CONTINUE TO RELY HEAVILY ON FOSSIL FUELS -- AND COAL IS OUR MOST ABUNDANT FOSSIL FUEL.

APPALACHIAN COAL WILL BE CRUCIAL FOR THE REMAINDER OF THIS CENTURY AND BEYOND.

IN 1975 NEARLY 400 MILLION TONS OF COAL WERE PRODUCED IN THE APPALACHIAN HILLS AND MOUNTAINS -- NEARLY TWO-THIRDS OF THE NATION'S TOTAL PRODUCTION.

NORTHERN APPALACHIA, INCLUDING WEST VIRGINIA, PRODUCED ALMOST 180 MILLION TONS. ALMOST 1/2

THAT PRODUCTION MUST INCREASE AS MORE AND MORE OF OUR ENERGY-USING EQUIPMENT CONVERTS FROM PETROLEUM, TO COAL

(--NEXT PAGE--) WEST VIRGINIA COAL...
WEST VIRGINIA COAL IS HIGH QUALITY COAL.

YOUR METALLURGICAL COAL IS THE FINEST IN THE WORLD.

I KNOW YOU ARE EXPERIENCING CUTBACKS AT THE MOMENT BECAUSE OF SLOW STEEL MARKETS, AND I WANT YOU TO KNOW THAT BOB STRAUSS, OUR SPECIAL AMBASSADOR FOR TRADE RELATIONS, IS WORKING ON THIS PROBLEM RIGHT NOW.

AS WE CONVERT TO COAL, WE MUST ASSURE THAT THE SUPPLY IS SURE AND STEADY.

WE MUST SOLVE THE UNDERLYING PROBLEMS THAT HAVE TROUBLED THE COAL INDUSTRY FOR GENERATIONS.

TO THAT END, . . .
TO THAT END, I AM ANNOUNCING TODAY THE CREATION
OF THE PRESIDENT'S COMMISSION ON THE COAL INDUSTRY.

YOUR OWN GOVERNOR -- JAY ROCKEFELLER -- HAS
AGREED TO HEAD THIS FIVE-MEMBER COMMISSION.

THE OTHER MEMBERS REPRESENTING THE PUBLIC WILL
BE FORMER SECRETARY OF LABOR WILLARD WIRTZ, WHOSE
EXPERIENCE IN LABOR-MANAGEMENT PROBLEMS GOES BACK
TO HIS MEMBERSHIP ON THE WAR LABOR BOARD DURING
WORLD WAR II, .... AND DAVID PRESLEY, A Distinguished
Business Leader FROM TEXAS.

I ALSO WILL APPOINT A MEMBER TO REPRESENT
LABOR AND ONE TO REPRESENT THE COAL OPERATORS.

IN ADDITION TO THESE FIVE VOTING MEMBERS,
NON-VOTING MEMBERS WILL INCLUDE THE SECRETARIES OF LABOR

(---NEXT PAGE ---) AND ENERGY, . .
AND ENERGY OR THEIR DESIGNEES, AND THREE EACH FROM THE HOUSE AND THE SENATE.

THE COMMISSION WILL CONDUCT A COMPREHENSIVE REVIEW OF THE COAL INDUSTRY IN THE UNITED STATES. ITS WORK WILL FOCUS ON FIVE GENERAL AREAS:

--- FIRST, THE GENERAL ECONOMIC HEALTH OF THE COAL INDUSTRY, INCLUDING PRODUCTIVITY AND CAPITAL INVESTMENT.

--- SECOND, LABOR-MANAGEMENT RELATIONS IN THE COAL FIELDS, INCLUDING COLLECTIVE BARGAINING, GRIEVANCE PROCEDURES, AND SUCH OTHER ASPECTS AS THE COMMISSION DEEMS APPROPRIATE.

THIRD, HEALTH, SAFETY, . . .
-- THIRD, HEALTH, SAFETY, AND LIVING CONDITIONS IN THE COAL FIELDS AND THE COAL-PRODUCING AREAS OF THE NATION.

-- FOURTH, THE DEVELOPMENT AND APPLICATION OF NEW TECHNOLOGIES.

-- FIFTH, THE IMPACT ON THE COAL INDUSTRY OF FEDERAL REGULATIONS.

THE EXECUTIVE ORDER SETTING UP THE COMMISSION CALLS FOR A FINAL REPORT TO ME NOT LATER THAN ONE YEAR AFTER THE FIRST MEETING.

THE ORDER ALSO AUTHORIZES THE COMMISSION TO SPONSOR A WHITE HOUSE CONFERENCE ON THE FUTURE OF THE COAL INDUSTRY,....... BRINGING IN REPRESENTATIVES OF ALL VIEWPOINTS TO HELP FIND SOLUTIONS TO EXISTING AND POTENTIAL PROBLEMS.

(-- NEXT PAGE --) I COME FROM . . .
I come from flat country, as you might imagine from the name of my hometown, 
_in South Georgia_. Our people have a lot in common with the people of West Virginia, but the land is about as different as land can be from your hills and mountains.

I've heard it said that if you ironed out West Virginia it would cover up the whole state in the nation, United States and then some.

Around plains, our prosperity always depended on the top few inches of our land -- the topsoil made us or broke us.

Here in West Virginia . . .
HERE IN WEST VIRGINIA IT HAS LONG BEEN WHAT WAS UNDER YOUR LAND THAT WAS THE KEY TO YOUR PROSPERITY -- AND SOMETIMES THE CAUSE OF YOUR MISERIES, PROBLEMS.

WE ABUSED THE LAND IN THE DEEP SOUTH FOR A LONG TIME. OVERWORKING IT, NOT PUTTING ENOUGH BACK INTO IT, ...... WE LET IT WASH AND BLOW AWAY.

FOR A LONG TIME THE HILLS OF WEST VIRGINIA WERE ABUSED, TOO -- YOUR CREEKS AND RIVERS POLLUTED, YOUR LAND SCARRED AND RAW, ...... AND TOO MANY OF THOSE WHO DUG THE WEALTH FROM UNDER THE GROUND LEFT POOR AND SICK AFTER THEIR LABORS.

(-- NEXT PAGE --) IN RECENT YEARS. ...
IN RECENT YEARS WE HAVE LEARNED HOW TO STOP
THIS DEVASTATION -- LEARNED HOW TO RESTORE THE
HILLS AFTER WE HAVE EXTRACTED THEIR WEALTH --
LEARNED HOW TO MAKE THINGS SAFER FOR THOSE WHO
BRING IT OUT OF THE EARTH.

THE LAND AND THE PEOPLE OF APPALACHIA HAVE
SACRIFICED MUCH TO MAKE THEIR PAST CONTRIBUTIONS
TO OUR NATIONAL DEVELOPMENT.

I AM DETERMINED THAT IN THE FUTURE, THIS LAND
AND ITS PEOPLE WILL SHARE IN THE BENEFITS OF
MEETING OUR NATION'S NEEDS.

(--NEXT PAGE--) WHEN I ANNOUNCED . . .
WHEN I ANNOUNCED THE NATIONAL ENERGY PLAN, I PROMISED THAT INCREASING PRODUCTION OF WEST VIRGINIA COAL WOULD NOT COME AT THE EXPENSE OF THE ENVIRONMENT, HEALTH, OR SAFETY OF THE PEOPLE OF WEST VIRGINIA.

I ANNOUNCED PROPOSALS EARLIER THIS MONTH FOR A 5-YEAR PROGRAM OF IMPACT ASSISTANCE TO HELP OFFSET SOME OF THE SOCIAL AND ECONOMIC COSTS OF INCREASING COAL PRODUCTION.

NATIONWIDE, THIS PROGRAM WOULD PROVIDE $675 MILLION IN GRANTS AND WILL PUT UP TO $75 MILLION TO GUARANTEE $1.5 BILLION IN LOANS.

GOVERNOR ROCKEFELLER . . .
GOVERNOR ROCKEFELLER, SENATOR RANDOLPH, AND
CONGRESSMAN STAGGERS HAVE BEEN OF IMMEASURABLE
ASSISTANCE IN DEVELOPING THIS PROGRAM.
WEST VIRGINIA HAS INDEED BEEN FORTUNATE TO
HAVE LEADERS LIKE THESE AND SENATE MAJORITY
LEADER BYRD TO REPRESENT YOUR INTERESTS.

IN MOUNTAINOUS COUNTRY LIKE YOURS, THERE ARE
EXTRA COSTS AND DIFFICULTIES IN BUILDING HOUSES,
ROADS, WATER LINES AND SEWERS.

THESE PROBLEMS ARE NOT NEW, BUT THEY MAKE
COPING WITH A RAPID INFLUX OF PEOPLE EVEN HARDER
THAN GROWTH WOULD BE IN FLAT COUNTRY.

(--NEXT PAGE--) IN MEETING YOUR....
IN MEETING YOUR SPECIAL NEEDS, LOCAL AND
STATE GOVERNMENTS MUST DO THEIR SHARE.
BUT THIS TIME THE FEDERAL GOVERNMENT WILL
HELP.

I AM ALSO COMMITTED TO FAIR AND FIRM
ENFORCEMENT OF THE NEW FEDERAL STRIP MINE LAW.
WEST VIRGINIA IS ALREADY DOING AN EXCELLENT
JOB IN RENEWING MINED AREAS.

WE MUST ALSO MEET OUR CLEAN AIR REQUIREMENTS
SO THAT GREATER USE OF COAL DOESN'T ENDANGER PUBLIC
HEALTH OR ENVIRONMENTAL QUALITY, AND WE NEED

AND WE NEED TO MEET . . .
And we need to meet these goals without giving undue advantage to one region's coal over another's.

To aid in this process we must work to insure that we develop technologies not just to burn coal as coal more efficiently, but also to convert that coal to synthetic liquids, gases, and solids that will meet future needs for clean burning fuels.

West Virginia has been a leader in technology development in this area, and will continue to lead as we move toward private sector commercialization of synthetics from coal.

Just recently...
JUST RECENTLY, I INTENSIFIED OUR EFFORTS TO
BRING THESE TECHNOLOGIES ON STREAM THROUGH A
SERIES OF DESIGN STUDIES, LEADING HOPEFULLY TO
CONSTRUCTION ON A JOINT GOVERNMENT-INDUSTRY
COAL LIQUIDS DEMONSTRATION PLANT HERE IN
WEST VIRGINIA.

THE FEDERAL GOVERNMENT SHOULD NOT SHOULDER
THE ENTIRE BURDEN OF DEVELOPING THESE
TECHNOLOGIES.

(-- NEXT PAGE --) HOWEVER, WORKING . . .
However, working together we can create the right climate -- through joint ventures, loan guarantees, and proper tariff treatment -- to help speed private sector development.

The nation will need synthetics from coal to meet our future energy needs, .......and West Virginia will play an important part in supplying both the coal and the technology to make this a reality.

The Congress passed, and I have signed, both new parts of the Black Lung legislation, broadening benefits and putting them on sound financial footing.

I also transferred ...
I also transferred the Mine Health and Safety Administration from the Interior Department to the Labor Department.

Despite all the progress, coal mining is still one of the dirtiest and most dangerous jobs on Earth.

Operating a mine has often been financially precarious, subject to fast-changing demand.

All of this has left scars that are slow to heal on West Virginia's lovely countryside, .... and on its people.

(-- NEXT PAGE --) But the healing ...
BUT THE HEALING PROCESS HAS BEGUN.

AND I AM DETERMINED THAT THE RISING DEMAND
FOR COAL TO MEET OUR ENERGY NEEDS WILL NOT LEAVE
SCARS ON YOUR LAND,....... OR ON THE PROUD AND
INDEPENDENT PEOPLE OF WEST VIRGINIA.

#  #  #
When I spoke to the nation a year and one month ago, I called energy the most serious continuing challenge that will face our nation in our lifetimes.

I remain convinced of the truth of that assessment.

Our ability to deal successfully with the problem of energy is a test of our will and our ingenuity, but it is more than that. It is a matter of national survival. For energy is inexorably linked to our prosperity at home and our security in the world -- both of which are imperiled by our great and growing thirst for foreign oil.

Last April, to dramatize the seriousness of the challenge, I compared it to war. And in this war,
the most formidable weapon in our arsenal is coal.

Ultimately, we will learn to capture the energy of the sun to meet our needs. But in this century, we have no choice but to continue to rely heavily on fossil fuels -- the non-renewable distillates of thousands of years of sunlight. And because coal is by far our most abundant source of fossil fuel, we will turn more and more to coal in the years ahead.

The abundance of coal under the American earth is one of our greatest national blessings. West Virginia alone could supply all our energy needs for more than a generation.

The coal of Appalachia will serve us in the future as it has in the past.

Appalachian coal fired the furnaces that made this nation a great industrial power. It fueled the
engines that first connected our land from sea to sea.

It still provides much of our industrial and electrical power -- and it will be crucial for the remainder of this century and beyond.

In 1975 nearly 400 million tons of coal were produced in the Appalachian hills and mountains -- nearly two-thirds of the nation's total production.

Northern Appalachia, including West Virginia, produced almost 180 million tons. That production must increase as more and more of our energy-using equipment converts from petroleum to coal.

West Virginia coal is high quality coal. Your metallurgical coal is the finest in the world. I know you are experiencing cutbacks at the moment because of slow steel markets, and I want you to know that Bob Strauss, our special ambassador for trade relations, is working on this problem right now.
and the Senate.

The Commission will conduct a comprehensive review of the coal industry in the United States. Its work will focus on five general areas:

-- First, the general economic health of the coal industry, including productivity and capital investment.

-- Second, labor-management relations in the coal fields, including collective bargaining, grievance procedures, and such other aspects as the Commission deems appropriate.

-- Third, health, safety, and living conditions in the coal fields and the coal-producing areas of the nation.

-- Fourth, the development and application of new technologies.
As we convert to coal, we must assure that the supply is sure and steady.

We must solve the underlying problems that have troubled the coal industry for generations.

To that end, I am announcing today the creation of the President's Commission on the Coal Industry. Your own Governor -- Jay Rockefeller -- has agreed to head this five-member commission. The other members representing the public will be former Secretary of Labor Willard Wirtz, whose experience in labor-management problems goes back to his membership on the War Labor Board during World War II, and David Presley, a banker from Texas. I also will appoint a member to represent labor and one to represent the coal operators.

In addition to these five voting members, non-voting members will include the Secretaries of Labor and Energy or their designees, and two each from the House
Fifth, the impact on the coal industry of Federal regulations.

The Executive Order setting up the Commission calls for a final report to me not later than one year after the first meeting. The order also authorizes the Commission to sponsor a White House Conference on the future of the coal industry, bringing in representatives of all viewpoints to help find solutions to existing and potential problems.

I come from flat country, as you might imagine from the name of my hometown. Our people have a lot in common with the people of West Virginia, but the land is about as different as land can be from your hills and mountains. [I've heard it said that if you ironed out West Virginia it would cover up the whole United States and then some.]

---

* South Georgia
Around Plains, our prosperity always depended
on the top few inches of our land -- the topsoil made
us or broke us. Here in West Virginia it has long
been what was under your land that was the key to your
prosperity -- and sometimes the cause of your miseries.

We abused the land in the Deep South for a long
time. Overworking it, not putting enough back into it,
we let it wash and blow away.

For a long time the hills of West Virginia were
abused, too -- your creeks and rivers polluted, your
land scarred and raw, and too many of those who dug
the wealth from under the ground were left poor and sick
after their labors.

In recent years we have learned how to stop
the devastation -- learned how to restore the hills
after we have extracted their wealth -- learned how to
make things safer for those who bring it out of the
earth.
The land and the people of Appalachia have sacrificed much to make their past contributions to our national development. I am determined that in the future, this land and its people will share in the benefits of meeting our nation's needs.

When I announced the national energy plan, I promised that increasing production of West Virginia coal would not come at the expense of the environment, health, or safety of the people of West Virginia.

I announced proposals earlier this month for a 5-year program of impact assistance to help offset some of the social and economic costs of increasing coal production. Nationwide, this program would provide $675 million in grants and will put up to $75 million to guarantee $1.5 billion in loans. Governor Rockefeller, Senator Randolph, and Congressman Staggers have been of immeasurable assistance in developing this program. West Virginia has indeed been
fortunate to have leaders like these and Senate Majority Leader Robert Byrd to represent your interests.

In mountainous country like yours, there are extraordinary costs and difficulties in building roads and water lines and sewers. These problems are not new, but they make coping with a rapid influx of people even harder than growth would be in flat country.

In meeting your special needs, local and state governments must do their share. But this time the Federal government will help.

I am also committed to fair and firm enforcement of the new Federal strip mine law. West Virginia is already doing an excellent job in renewing mined areas.

We will also need to meet our clean air requirements so that greater coal use is consistent with protecting public health and environmental quality, and we need to meet these goals without giving undue
The Congress passed, and I have signed, both parts of the black lung legislation, broadening benefits and putting them on sound financial footing. We also transferred the Mine Health and Safety Administration from the Interior Department to the Labor Department.

Despite all the progress, coal mining is still one of the dirtiest and most dangerous jobs on earth. Operating a mine has often been financially precarious, subject to fast-changing demand. All of this has left scars that are slow to heal on West Virginia's lovely countryside, and on its people. But the healing process has begun. And I am determined that the rising demand for coal to meet our energy needs will not leave new scars on your land, or on the proud and independent people of West Virginia.

RE: PRESIDENTIAL COMMISSION ON COAL
During the coal strike you promised to appoint a Presidential Commission on Coal. We have consulted widely on the structure, responsibilities, and membership of the proposed Commission. Based on these consultations we recommend that the Commission be structured as follows: (Draft Executive Order attached)

I. Membership

A. Commission Size

The key question of how large to make the Commission depends on whether the various factions and segments of the industry should be represented. These factions -- union and non-union, Miller and anti-Miller, steam coal and soft coal, western and eastern, strip and deep, etc. -- need to feel a sense of participation if the Commission's recommendations are to be widely accepted. Moreover, a large Commission would help to please more members of Congress, many of whom have recommended members for the Commission. On the other hand there are obviously too many factions for all to have seats at the table.

Because of the difficulty of satisfying all factions, we believe that the Commission should be limited to five members, of whom three, including the Chairman, would be representatives of the general public. One member would represent labor and one would represent management. The labor and management representatives, however, would not be appointed by the UMW and the BCOA but would be chosen by you from among individuals recommended by these groups to represent their points of view.
With this size Commission we will be able to keep the group small enough to preserve its effectiveness. The Commission could appoint subcommittees of experts and others in the industry to help it to work on specific issues. With only five members, the Commission will be exclusive enough to limit charges of unfair allocation of seats.

Approve _________ Disapprove ______________

B. Non-voting public members

In order to add stature and visibility to the Commission we recommend that it include some government officials as non-voting members. Specifically we recommend that the Secretaries of Energy and Labor, and two members (D&R) each from the House and Senate sit on the Commission. These ex-officio representatives would serve both to help ground the Commission in political realities and to keep the government and the Congress informed of the Commission's activities.

Approve _______________ Disapprove _______________

II. Commission Responsibilities

The Commission's Charter would specify four major areas of focus:

1) Labor-management relations, including collective bargaining and grievance procedures.

2) Productivity incentives for both labor and management, including capital investment needs, absenteeism and strikes, and coal research.

3) Health and Safety problems.

4) Government Regulations, including MHSA, and EPA rules.

In addition the Commission would have broad power to investigate and make recommendations concerning other areas of concern to the industry. The Commission would also have responsibility for coordinating the White House Conference on Coal. It could also hold hearings in the field and develop grievance training procedures and programs. The Commission would be required to file its report and recommendations to you within one year of its first meeting and would expire within 30 days after that report.

Approve _________ Disapprove ______________

(Can we abbreviate any?)
III. Staff and Budget

The Commission would be empowered to hire its own staff of approximately 15-25 professionals. Its budget would be $1 - 1.5 million, which would come from the discretionary funds of the Secretaries of Labor and Energy. Commission members would be paid on a per diem basis for their meetings and other time. Additional support would be provided by the Secretaries of Labor and Energy, along with the Appalachian Regional Commission, the Federal Mediation and Conciliation Service, and other government agencies.

Approve [ ]  Disapprove [ ]

IV. Public Members

We have solicited recommendations on potential Commission members from many Congressmen, Senators, Governors and others. If you approve of this Commission structure, a memo from Ray Marshall and Hamilton suggesting recommended candidates will be forwarded to you shortly.

V. Announcement

We recommend that you announce the Commission's formation, and its Chairman, when you are in Charleston, West Virginia next week. The announcement should be particularly well received there.

Approve [ ]  Disapprove [ ]
EXECUTIVE ORDER

PRESIDENT'S COMMISSION ON THE COAL INDUSTRY

By the authority vested in me as President by the Constitution of the United States of America, and in order to establish, pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), a balanced forum to review the state of the Nation's coal industry, it is hereby ordered as follows:

1-1. Establishment and Membership.

1-101. There is hereby established the President's Commission on the Coal Industry.

1-102. The membership of the Commission shall be as follows:

(a) Five members shall be appointed by the President. One shall represent the interests of labor, one shall represent management and three shall represent the general public. The labor and management representatives shall be chosen from among candidates recommended by the United Mine Workers of America and the Bituminous Coal Operators Association of America, but shall not be members of these organizations. The President shall designate one of the members representing the general public to chair the Commission.

(b) The President of the Senate and the Speaker of the House of Representatives may designate two members of their respective Houses to serve as non-voting members of the Commission.

(c) The Secretary of Labor and the Secretary of Energy or their designees shall also be non-voting members of the Commission.

1-2. Functions.

1-201. The Commission shall conduct a comprehensive review of the state of the coal industry in the United States with particular emphasis on matters pertaining to productivity,
capital investment, and the general economic health of the industry; collective bargaining, grievance procedures, and such other aspects of labor-management relations as the Commission deems appropriate; health, safety and living conditions in the Nation’s coal fields; the development and application of new technologies to the industry; the impact on the coal industry of Federal regulations and such other matters as the Commission deems appropriate.

1-202. The five members appointed by the President shall prepare and transmit a final report of their findings and recommendations to the President, the Secretary of Labor and the Secretary of Energy. Prior to transmitting these findings and recommendations, the Chairman shall afford all other members of the Commission an opportunity to attach any comments.

1-203. To assist the Commission in the exercise of its functions, the Commission may sponsor a White House Conference on the future of the coal industry.

1-3. Administration.

1-301. To the extent authorized by law, the General Services Administration shall provide the Commission with all necessary administrative services, facilities and support on a reimbursable basis.

1-302. The Department of Labor and the Department of Energy shall, to the extent permitted by law and subject to the availability of funds, provide the Commission with such information, advice, services, and funds as may be necessary for the effective performance of its functions.

1-303. Each member of the Commission who is not otherwise employed in the Government may receive compensation at the rate now or hereafter prescribed by law for GS-15 of the General Schedule for each day such member is engaged in the work of the Commission. Each member may also receive travel expenses, including per diem in lieu of subsistence (5 U.S.C. 5702 and 5703).
1-304. The functions of the President under the Federal Advisory Committee Act (5 U.S.C. App. I) which are applicable to the Commission, except that of reporting annually to the Congress, shall be performed by the Administrator of General Services.

1-401. The final report required by Section 1-202 of this Order shall be transmitted not later than one year from the date of the first meeting of the Commission.

1-402. The Commission shall terminate thirty days after submission of its final report.

THE WHITE HOUSE,
EXECUTIVE ORDER
---------------

PRESIDENT'S COMMISSION ON THE COAL INDUSTRY

By the authority vested in me as President by the Constitution of the United States of America, and in order to establish, pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), a balanced forum to review the state of the Nation's coal industry, it is hereby ordered as follows:

1-1. Establishment and Membership.

1-101. There is hereby established the President's Commission on the Coal Industry.

1-102. The membership of the Commission shall be as follows:

(a) Five members shall be appointed by the President. One shall represent the interests of labor, one shall represent management and three shall represent the general public. The labor and management representatives shall be chosen from among candidates recommended by the United Mine Workers of America and the Bituminous Coal Operators Association of America, but shall not be members of these organizations. The President shall designate one of the members representing the general public to chair the Commission.

(b) The President of the Senate and the Speaker of the House of Representatives may designate three members of their respective Houses to serve as non-voting members of the Commission.
(c) The Secretary of Labor and the Secretary of Energy or their designees shall also serve as non-voting members of the Commission.

1-2. Functions.

1-201. The Commission shall conduct a comprehensive review of the state of the coal industry in the United States with particular emphasis on matters pertaining to productivity, capital investment, and the general economic health of the industry; collective bargaining, grievance procedures, and such other aspects of labor-management relations as the Commission deems appropriate; health, safety and living conditions in the Nation's coal fields; the development and application of new technologies to the industry; the impact on the coal industry of Federal regulations; and such other matters as the Commission deems appropriate.

1-202. The five members appointed by the President shall prepare and transmit a final report of their findings and recommendations to the President, the Secretary of Labor and the Secretary of Energy.

1-203. To assist the Commission in the exercise of its functions, the Commission may sponsor a White House Conference on the future of the coal industry.

1-3. Administration.

1-301. To the extent authorized by law, the General Services Administration shall provide the Commission with all necessary administrative services, facilities and support on a reimbursable basis.
1-302. The Department of Labor and the Department of Energy shall, to the extent permitted by law and subject to the availability of funds, provide the Commission with such information, advice, services and funds as may be necessary for the effective performance of its functions.

1-303. Each member of the Commission who is not otherwise employed in the Government may receive compensation at the rate now or hereafter prescribed by law for GS-15 of the General Schedule for each day such member is engaged in the work of the Commission. Each member may also receive travel expenses, including per diem in lieu of subsistence (5 U.S.C. 5702 and 5703).

1-304. The functions of the President under the Federal Advisory Committee Act (5 U.S.C. App. I) which are applicable to the Commission, except that of reporting annually to the Congress, shall be performed by the Administrator of General Services.

1-401. The final report required by Section 1-202 of this Order shall be transmitted not later than one year from the date of the first meeting of the Commission.

1-402. The Commission shall terminate thirty days after submission of its final report.
